ABOUT ME

- AI Engineer and Backend Developer passionate about building scalable AI-powered applications using Python, FastAPI, and modern LLM technologies. Experienced in developing RAG pipelines, semantic search systems, REST APIs, and intelligent backend architectures using LangChain, Elasticsearch, Redis, and FAISS. Strong interest in Generative AI, Machine Learning, and real-world AI system design.

EDUCATION

Arya College of Engineering and I.T. (Affiliated to Rajasthan Technical University) Jaipur, Rajasthan
Bachelor of Technology, Electronics and Communication 2021 - 2025

Jayshree Periwal High School Jaipur, Rajasthan
School

EXPERIENCE

Sarv.com Jaipur, Rajasthan
Software Developer Intern 10/2025 - 02/2026

- Developed production-ready authentication APIs for Naam.ai, implementing secure login workflows, access control, and backend integrations for a live AI-powered platform.
- Designed Elasticsearch-based user data workflows to index and manage login-related information for efficient storage and retrieval.
- Monitored and resolved production-level API and authentication bugs after deployment, improving system stability and user experience.
- Worked on RAG-based chatbot workflows using embeddings and semantic retrieval for contextual AI-driven responses.

Technolader Pvt. Ltd. Jaipur, Rajasthan
Python Developer Trainee 07/2024 - 08/2024

- Worked on Python-based applications and scripts, gaining hands-on experience in software development.
- Collaborated with the development team to build and test Python modules using Pandas and NumPy for basic data handling tasks.

Jaipur Metro Rail Corporation Ltd. (JMRC) Jaipur, Rajasthan
Internship/Training 07/2023 - 09/2023

- Worked in various departments of Telecoms and signaling
- Gaining hands on experience under the team in the fields of ATS, ATO, ATP

SKILLS

- **Languages & Development:** Python, SQL, FastAPI, Django, HTML, CSS, JavaScript
- **AI/ML & Data Science:** Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning, Data Analysis, Data Visualization
- **Generative AI & LLMs:** LangChain, HuggingFace, Transformers, NLP, RAG, Embeddings, Sentence Transformers, FAISS, ChromaDB
- **Databases & Search:** Elasticsearch, Redis
- **Tools & Platforms:** Git, GitHub, Docker, AWS, VS Code, Jupyter Notebook
- **Concepts:** REST APIs

CERTIFICATIONS

- IBM Data Science Professional Certificate – IBM / Coursera
- Generative AI Fundamentals – IBM / Coursera
- Python for Data Science, AI & Development – IBM / Coursera

PROJECTS

AI Study Assistant

- Built an AI-powered study assistant using RAG and LLMs to provide personalized explanations and context-aware learning support.
- Implemented semantic search, conversational memory, and learner progress tracking using embeddings and vector databases.
- Developed automated quiz generation and adaptive study workflows to enhance engagement and knowledge retention.

FastAPI Authentication system

- Built a complete authentication workflow using FastAPI, including signup, login, logout, and protected dashboard routes.
- Implemented Elasticsearch for user data storage and Redis-based token management to handle active login sessions efficiently.
- Secured APIs using JWT-based authentication with role-based access control (RBAC) to restrict access to protected endpoints.

Virtual Assitant

- Created a multi-tasking virtual assistant using Python, integrating OpenAI APIs/GROQ API for NLP-driven conversational abilities.
- Implemented features such as speech recognition, search automation, and task scheduling.
- Developed modular and extensible architecture allowing easy integration of new features like APIs, reminders, and third-party services.

VOLUNTEER ROLE

- Volunteered at Cipher: The coding club, ACEIT Jaipur, contributing to events and community building
- Volunteer in various fests and sports events
